

5/29/18

Dear Parents,

Our Summer Math IXL Program for Grades 3-5 will begin on June 8th – August 19th. This program will help to maintain what your child has learned this year in math and it will also better prepare him/her for next year. **Your child will need to complete a total of 4.5 hours on IXL on skills from the grade level that was just completed.** This number is based on completing 30 minutes per week. Keep in mind that this program is designed to have your child work on math skills throughout the summer and not just log in the time at the beginning of the summer or all in one week. The children really enjoy this program and are free to log in more time if they choose to. Also, once your child has logged in the 4.5 hours at the grade level that was just completed, he/she may work on higher skills.

The time logged in will be checked by your child's classroom teacher on August 20th. Your child's class will decide on a reward for the children who completed a total of 4.5 hours working on IXL skills. **If your child works on below grade level skills, this time will not count.** ***Please be sure to use the IXL time logged in and not your own time. The IXL program does not count idle time on the program.

Thank you in advance for having your child participate in this Summer IXL Math Program. Have a wonderful summer!

Sincerely,

The 3-5 Teachers
