

6/6/22

Dear Parents,

Our Summer Math IXL Program for Grades K-5 will begin on June 10th – August 21st. This program will help to maintain what your child has learned this year in math and it will also better prepare him/her for next year. Your child's recent MAP scores have been added to your child's IXL account. Based on your child's MAPS subscores for different skills, the program will recommend a skill plan for your child to work on. **Your child will need to complete the following hours based on the grade he/she JUST completed:**

Grades K-2: 4 hours

Grades 3-5: 4 ½ hours

This number is based on completing approximately 20-25 minutes per week. Keep in mind that this program is designed to have your child work on math skills throughout the summer and not just log in the time at the beginning of the summer or all in one week. The children really enjoy this program and are free to log in more time if they choose to.

The time logged in will be checked by your child's classroom teacher on August 21st. **As an incentive, if your child completes the required minimum time, he or she will be able to participate in a pizza party at the beginning of the school year (date to be determined).** ***Please be sure to use the IXL time logged in and not your own time. The IXL program does not count idle time on the program.

To find your child's skill plan, have your child log on to IXL and under the green bar, click on skill plans and then your personal skill plan. Your child can then work on any of the skills in his/her plan. Once all current skills are completed, your child may click "I'm ready for more" and more skills will be added to his/her plan.

Thank you in advance for having your child participate in this Summer IXL Math Program. Have a wonderful summer!

Sincerely,

The K-5 Teachers
